# Materials Science and Technology

## Author Index

Vol. 12, 1996

Abotani, K.	1057	Clavaguera-Mora, M. T.	98	Gu, J.	802
Ajustron, E.	86	Cook, S. G.	366	Guillot, G.	94
Alsina, F.	108	Cool, T.	40	Gutiérrez, I.	45
Ambrose, J. C.	72	Coratger, R.	86		
Ammann, J.-J.	995	Corlett, N.	662	Hamid Ali, A. S.	679, 780, 1021
Ankara, A.	421, 557	Cornet, A.	190	Hänninen, H.	1064
Aoki, R.	1057	Cotterill, P. J.	523	Hardie, D.	802
Argent, B. B.	117	Cristina, M. C.	794	Harste, K.	378
Arnaud, G.	98, 108			Hayes, P. J.	274
Arrell, N.	617	Dai, Y.	831	Heitz, R.	90
Arumugham, S.	607	Das, D. K.	295	Higashi, K.	35, 505
Astanin, V. V.	489, 545	Davis, R. F.	94	Hinton, B. R. W.	928
Attorre, D. R.	697	Day, A.	873	Hippesley, C. A.	1035
Axén, N.	757	den Ouden, G.	81	Hirose, A.	1057
		Dey, G. K.	705	Ho, T.-Y.	64
Bai, M.-W.	1015	Dezausier, C.	108	Hodgson, P. D.	788
Baker, T. J.	421, 557	Dharmadasa, I. M.	86	Hoffmann, A.	90
Baker, T. N.	227, 595	Di Ciocco, L.	108	Hooijmans, J. W.	81
Baldwin, K. R.	937	Diaz, J.	178	Howard, G. D.	937
Bamberger, M.	290	Diéguez, A.	190	Hu, C.	227
Banerjee, S.	705	Din, T.	269, 644	Hu, J.	323
Baranov, P. G.	90	Dirnfeld, S. F.	290	Huang, J. C.	495
Barney, C.	917	Dobaczewski, L.	193	Hughes, A. E.	928
Bate, P. S.	730, 735	Dobson, S. J.	139	Humphreys, F. J.	143, 158, 889
Beanland, R.	181	Doel, T. J. A.	586	Hutchings, M.	757
Beauvillain, J.	86	Dotor, M. L.	187	Hwang, W.-S.	539
Bécourt, N.	108	Driver, J. H.	851	Hwang, Y. M.	495
Berberich, S.	98	Ducroquet, F.	94		
Bhadeshia, H. K. D. H.	40, 121, 233, 453, 610	Dunlop, G. L.	741	Islam, M. F.	623
Bhattacharya, S. S.	545, 635	Dunstan, D. J.	181	Iwasaki, H.	505
Bi, J.	751	Dymski, S.	385		
Billon, T.	94	Ehrström, J. C.	717	Jarfors, A. E. W.	990
Bisaro, R.	178	El Felk, Z.	98	Jausaud, C.	94
Blomfield, C. J.	86	El Ghrandi, R.	103	Jayakumar, T.	56
Bolingbroke, R. K.	897	Elliott, R.	679, 780, 1021	Jensen, D. J.	889, 897
Bourgoin, J. C.	178	Ellis, M. B. D.	970	Jha, S. K.	955
Bowen, A. W.	880	Engler, O.	717, 859	Jiang, J.-Q.	362, 483
Bowen, P.	523, 586, 917	Eswara Prasad, N.	563	Jonas, J. J.	579
Boyd, J. D.	808, 1043	Evans, M.	149	Jones, H.	25, 651, 981
Brand, A. J.	963			Jong, S.-H.	539
Bray, D. J.	937	Faizova, S. N.	489	Jordan, M. P.	171
Bredé, M.	416	Farrar, R. A.	237		
Briones, F.	187	Faulkner, R. G.	818, 904	Kang, S. B.	12, 628
Brounkov, P. N.	94	Fletcher, A. J.	477	Kang, Z. Q.	59
Bryant, A. W.	117	Flewitt, P. E. J.	818, 904	Kapranos, P.	274
Bulmer, L. J.	436	Flower, H. M.	617	Karhausen, K.	963
		Fox, K. M.	917	Kaynak, C.	421, 557
Cabrera, J. M.	579	Furu, T.	201, 889, 897	Kaysser, W. A.	213
Calleja, E.	181			Kendall, K. N.	436
Camassel, J.	98, 108	Gai, X. Y.	59	Khan, T. I.	603
Campbell, J.	269, 644	Garboggini, A.	329	Kidd, P.	181
Canlerer, J.	103	García-Escorial, A.	794	Kim, B.-K.	362
Caruana, G.	25, 794	García-Pérez, F.	187	Kim, Y.-J.	362
Caul, M.	844	Gardiner, R. W.	937	King, J. E.	366, 911
Cavenett, B. C.	86	Garrido, B.	103	King, S.	477
Chacon-Nava, J.	171	Gassmann, R. C.	691	Kirkwood, D. H.	274
Chakraborty, M.	766	Gater, C. A.	613	Klodt, J.	290
Chakravarty, J. K.	705	Gavard, L.	453	Knobel, M.	464
Chan, H. M.	143	Gibson, R. C.	274	Kobayashi, K. F.	1057
Chang, L. C.	233	Gjengedal, R.	343	Koop, R.	963
Chen, M.	1015	Golmayo, D.	187	Kouloumbi, N.	533

- |                           |   |   |                                   |
|---------------------------|---|---|-----------------------------------|
| Absorption                | 81, 103                                     | Composites  | 436, 757                          |
| Acicular ferrite          | 237   | See also Ceramic matrix composites, Fibre composites, |                                   |
| Acoustic emission         | 56, 917                                     | Laminate composites, Metal matrix composites,         |                                   |
| Activation energy         | 635   | Particulate composites, Polymer matrix composites,    |                                   |
| Adhesion                  | 1, 213                                      | Whisker composites                                    |                                   |
| Admittance spectroscopy   | 94  | Compound formation                                    | 117                               |
| Aerospace                 | 269, 644                                    | Compression tests                                     | 579, 963                          |
| Age hardening             | 741   | Continuous casting                                    | 132                               |
| Aging                     | 25, 469, 586, 911                           | Conversion coating                                    | 928                               |
| Alloying additions        | 12, 35, 158, 295, 315, 338                  | Cooling   | 539, 808, 1043                    |
| Aluminium                 | 139, 158, 163, 201, 539, 766, 851, 889, 897 | Copper  | 163, 628, 990                     |
| Aluminium alloys          |   | Copper alloys   | 464, 477                          |
| Al-Cr                     | 794   | Corrosion fatigue                                     | 1064                              |
| Al-Cr-Zr                  | 25  | Corrosion mechanisms                                  | 261                               |
| Al-Cu                     | 269, 545                                    | Corrosion resistance                                  | 937                               |
| Al-Cu-Li-Mg               | 563   | Crack growth  | 421, 557                          |
| Al-Cu-Mg                  | 644, 928                                    | Creep   | 405                               |
| Al-Cu-Mg-Zr               | 1001  | Creep and fracture behaviour                          | 513                               |
| Al-Cu-Mn-Si               | 323   | Creep rupture   | 149                               |
| Al-Fe-Mg-Si               | 315   | Creep strength  | 35                                |
| Al-Fe-Si-V                | 970   | Crystal growth  | 1, 98, 771                        |
| Al-Li-Cu-Mg-Zr            | 735   |   |                                   |
| Al-Mg                     | 12, 518                                     | Data processing                                       | 837, 844                          |
| Al-Mg-Cu                  | 628   | Deep level defects                                    | 90                                |
| Al-Mg-Si                  | 306, 644                                    | Deformation   | 610                               |
| Al-Ni                     | 143   | Densification   | 477                               |
| Al-Si                     | 295, 483, 539                               | Diamond coatings                                      | 1                                 |
| Al-Si-Mg                  | 269   | Dielectrics   | 533                               |
| Al-Zn-Mg-Cu-Zr            | 717   | Diffusion bonding                                     | 45, 623                           |
| Analytical electron       | 552   | Directional recrystallisation                         | 730                               |
| Anelasticity              | 139   | Dislocation mobility                                  | 489                               |
